

Career Profile for Business Management Information Systems

General Program Description: The **Associate in Applied Science (AAS) in Business Management Information Systems** is designed to give you the competency, tools, and capabilities necessary to successfully contribute in the demanding and dynamically changing role of today's Internet-dominated environment - 200 million U.S. Internet users and counting! The demand for excellence in information management is greater now than ever before. Outstanding managers with solid information technology credentials are the most sought after professionals today. **Certificates of Completion (CCL)** are available in Management, Marketing, Real Estate, Salesmanship, Small Business, Technology, Network security, and Web Design.

State and National Certification: Although certification is not necessarily required for most computer and information systems manager positions, there is a wide variety of certifications available that may be helpful in getting a job. These certifications are often product-specific, and are generally administered by software or hardware companies rather than independent organizations.

Advancement options: With the explosive growth of electronic commerce and the capacity of the Internet to create new relationships with customers, the role of computer and information systems managers will continue to evolve. Workers who have experience in web applications and Internet technologies will become increasingly vital to their companies. Opportunities for those who wish to become computer and information systems managers should be closely related to the growth of the occupations they supervise and the industries in which they are found.

Projected Job Growth: Employment of computer and information systems managers is expected to grow 16 percent over the 2006-16 decade, which is faster than the average for all occupations. New applications of technology in the workplace will continue to drive demand for workers, fueling the need for more managers.

Location	Pay Period	Bureau of Labor Statistics - 2006 Salaries*		
		Entry-level	Median	Experienced
United States	Hourly	\$22.71	\$37.34	\$62.83
